

**AMENDMENT TO THE FIGURES**

Figure 3 has been amended in order to overcome the objection to the figure. A Replacement Sheet is attached to this response. Figure 3 was a photograph of a barrel compressor showing some internal parts. It was objected to because it did not reproduce well. The replacement figure is a schematic of a barrel compressor showing some internal parts. The replacement figure is readily reproducible. Figure 3 is prior art used only to show the inner parts of a compressor. No new matter is added by the replacement figure.
